1. Introduction

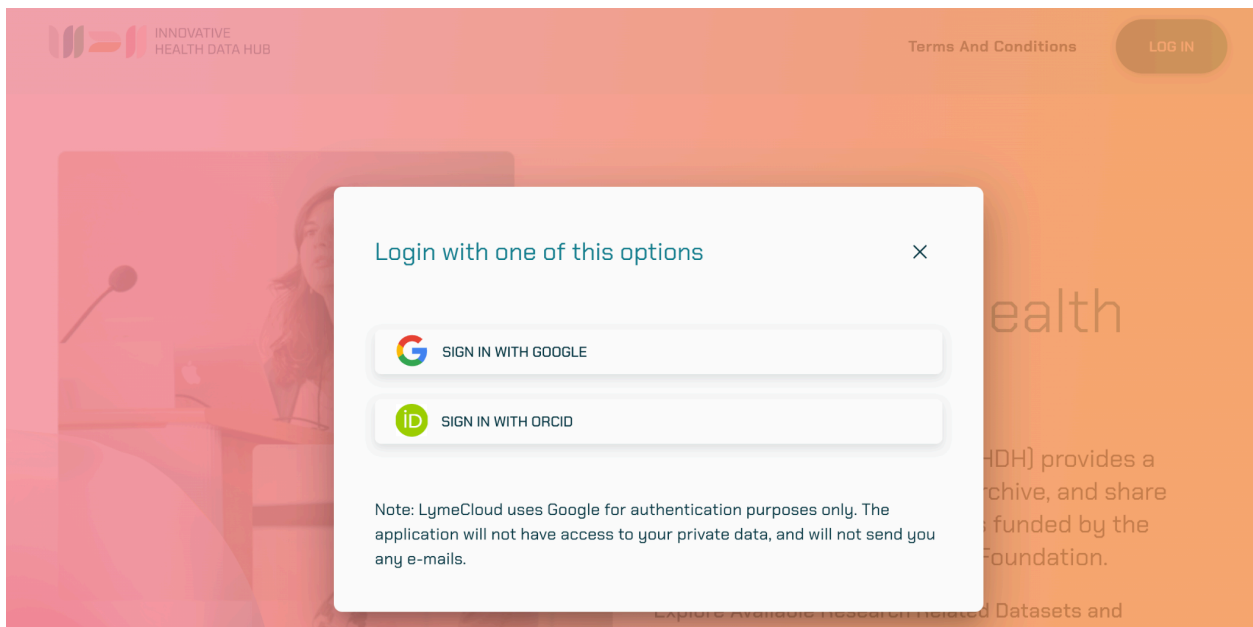

1.1 Overview

[IHDH](#) (Innovation Health Data Hub) is designed to enable investigators to share and archive the biomedical research data that they produce. The hope is that the repository will not only serve as a file system to store data produced by the consortium for the long term but also enable investigators to collaborate and find published datasets to accelerate research and discovery.

2. User Accounts

2.1 Log in

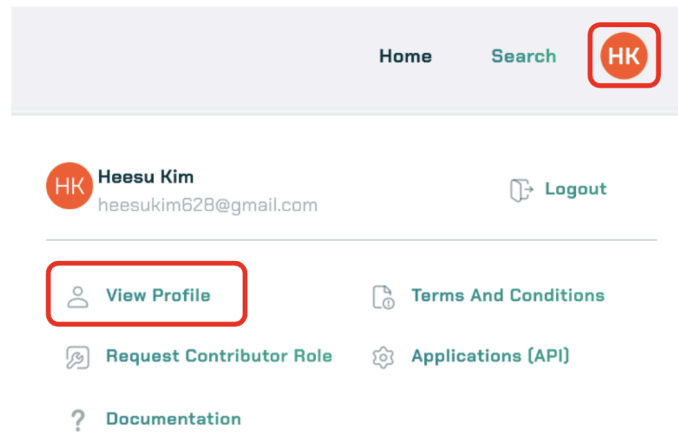

IHDH allows you to use your own Google or ORCID accounts to sign in.

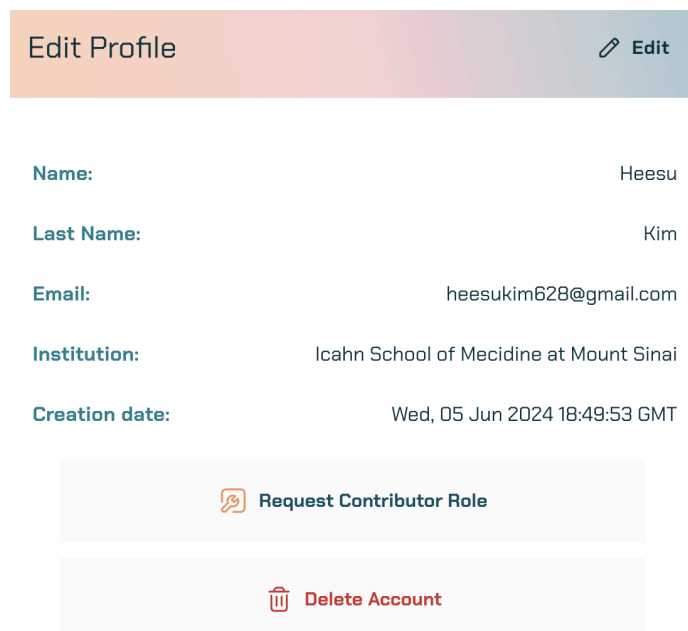

Please note that these accounts are only utilized for user identity verification. IHDH does not gain access to any additional data or has access to your login credentials.

2.2 User Profiles

Once logged in, you can access your profile by clicking the user icon at the top right corner.

Basic user information is available on [View Profile](#).

2.2.1 Editing your User Profile

Once you click the **Edit** button, you can change your profile information including your **First Name**, **Last Name**, and **Institution**.

2.3 Request a Contributor Role

Users need to contact the admin by **e-mailing** support@ihdh.io to request a contributor role. Remember to specify which collections you need to access as a contributor in the request email.

Once the email is received, the admin will work with the requester to provide all required permissions, if appropriate.

This information is accessible in the User Account.

The screenshot displays a user account page for Heesu Kim. At the top, there is a navigation bar with 'Home', 'Search', and a profile icon labeled 'HK'. Below this, the user's name 'Heesu Kim' and email 'heesukim628@gmail.com' are shown, along with a 'Logout' button. A menu of options is presented, including 'View Profile', 'Terms And Conditions', 'Request Contributor Role' (highlighted with a red box), 'Applications (API)', and 'Documentation'. Below the menu is an 'Edit Profile' section with a gradient background and an 'Editing' status. The profile form includes fields for Name (Heesu), Last Name (Kim), Email (heesukim628@gmail.com), Institution (Icahn School of Mecidir), and Creation date (Wed, 05 Jun 2024 18:49:53 GMT). At the bottom, there are two buttons: 'Request Contributor Role' (highlighted with a red box) and 'Delete Account'.

Request Contributor Role
Delete Account

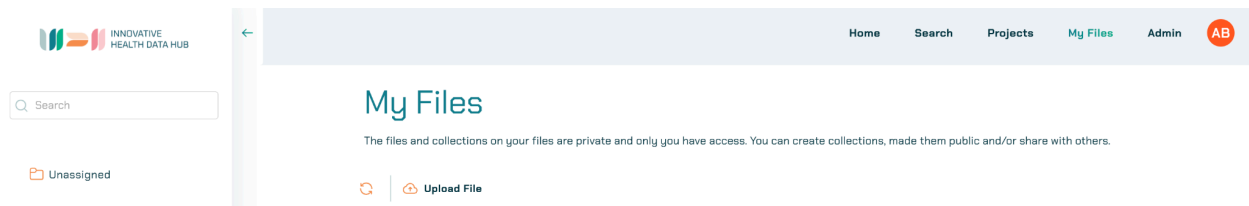

Once users click [Request Contributor Role](#), a pop-up with relevant information will appear.

3. Files

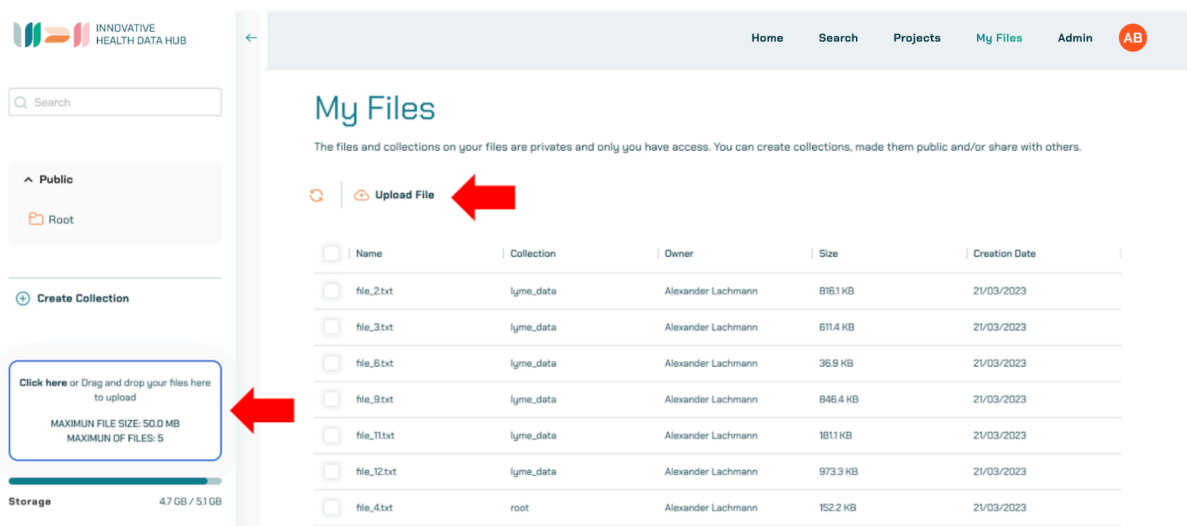

3.1 Managing Files

By clicking **My Files** on the top right of the page, you can manage the files that you have uploaded to IHDH. The files and collections of your files are private. This means that only you have access to them.

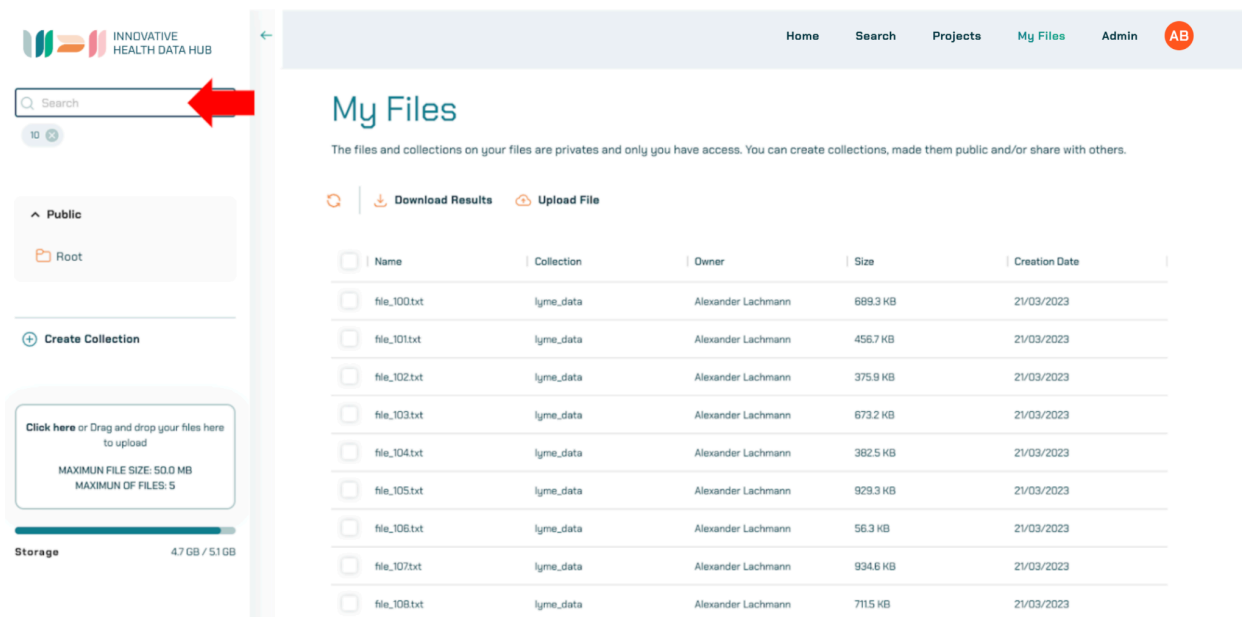

3.2 Uploading Files

To upload files, you can either drag and drop the files to the indicated area, or navigate to the files in your local directory.

Once the file upload is completed, refresh the page to check if the new file is available in your directory.

It is possible to search the file using its name.

The screenshot shows the 'My Files' page of the Innovative Health Data Hub. The left sidebar contains a search bar, a 'Public' section with a 'Root' folder, a 'Create Collection' button, and an upload area with a storage indicator showing 4.7 GB / 5.1 GB. The main content area has a navigation bar with 'Home', 'Search', 'Projects', 'My Files', and 'Admin'. Below the navigation bar, the 'My Files' section displays a table of files. A red arrow points to the search bar in the sidebar.

☐	Name	Collection	Owner	Size	Creation Date
☐	file_100.txt	lyme_data	Alexander Lachmann	689.3 KB	21/03/2023
☐	file_101.txt	lyme_data	Alexander Lachmann	456.7 KB	21/03/2023
☐	file_102.txt	lyme_data	Alexander Lachmann	375.9 KB	21/03/2023
☐	file_103.txt	lyme_data	Alexander Lachmann	673.2 KB	21/03/2023
☐	file_104.txt	lyme_data	Alexander Lachmann	382.5 KB	21/03/2023
☐	file_105.txt	lyme_data	Alexander Lachmann	929.3 KB	21/03/2023
☐	file_106.txt	lyme_data	Alexander Lachmann	56.3 KB	21/03/2023
☐	file_107.txt	lyme_data	Alexander Lachmann	934.6 KB	21/03/2023
☐	file_108.txt	lyme_data	Alexander Lachmann	711.5 KB	21/03/2023

By selecting a single file, you can use the following actions:

- **Edit** : Update the file name, collection, status, accessibility, visibility, and metadata
- **Delete**: Remove file from IHDH
- **Add to Collection**: Put the file in a collection
- **Copy Link**: Share a link to access the file
- **Download File**: Download the file
- **Download Metadata**: Get metadata in JSON format

My Files

The files and collections on your files are private and only you have access. You can create collections, make them public and/or share with others.

	 Edit	 Delete	 Add To Collection	 Copy Link	 More
☒	Name	Collection	Owner		Creation Date

☐	file_11.txt	lyme_data	Alexander Lachmann	181.1 KB	21/03/2023

3.5 Uploading Files Containing Protected Health Information

To store and establish controlled access to files containing protected health information (PHI), please contact IHDH at support@ihdh.io.

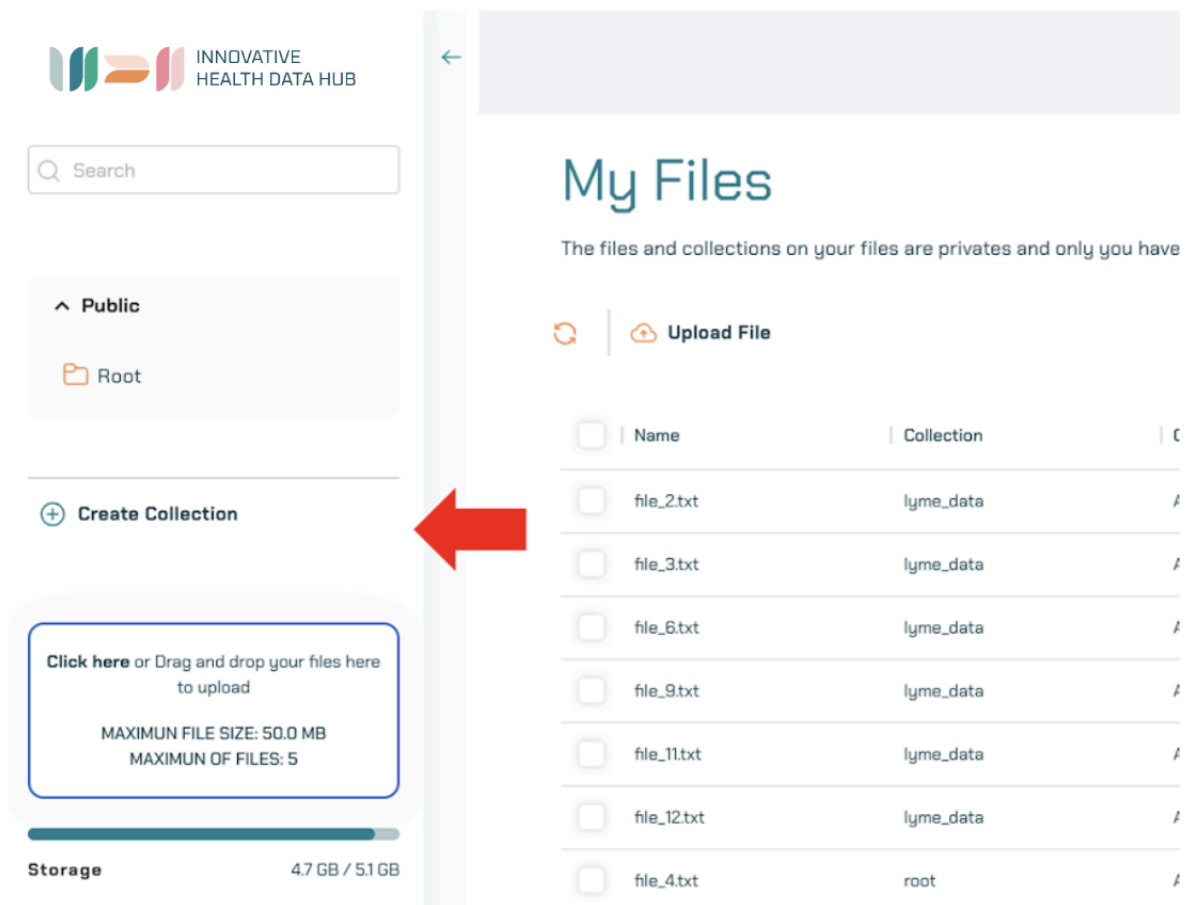

As stated in the outlined Terms and Conditions, **DO NOT upload protected data to IHDH directly.**

4. Collections

With collections, you can manage your files into groups, to facilitate bulk-file access management.

4.1 Creating Collections

You can click on [Create Collection](#) on the left to create a new directory.

INNOVATIVE HEALTH DATA HUB

Search

Public

Root

Create Collection

Click here or Drag and drop your files here to upload

MAXIMUM FILE SIZE: 50.0 MB
MAXIMUM OF FILES: 5

Storage 4.7 GB / 5.1 GB

My Files

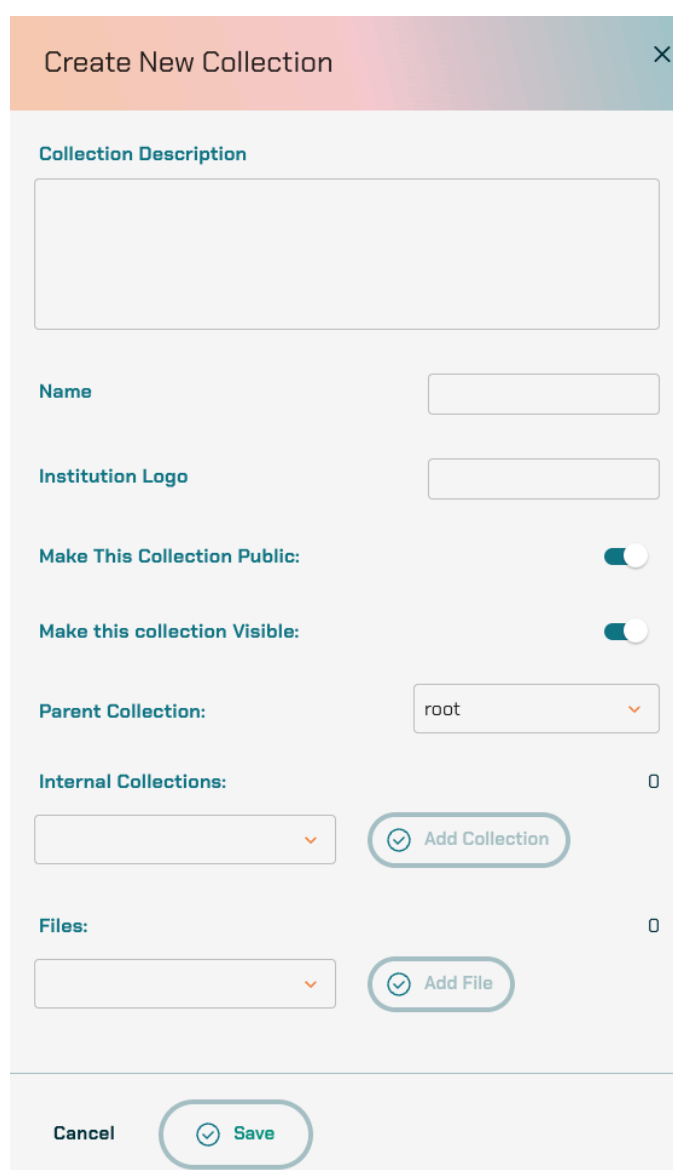

The files and collections on your files are private and only you have

Upload File

☐	Name	Collection	
☐	file_2.txt	lyme_data	/
☐	file_3.txt	lyme_data	/
☐	file_6.txt	lyme_data	/
☐	file_9.txt	lyme_data	/
☐	file_11.txt	lyme_data	/
☐	file_12.txt	lyme_data	/
☐	file_4.txt	root	/

Now you will see a window for the new collection. You can identify the values of the following fields:

- **Description**
- **Name**
- **Institution Logo**
- **Make This Collection Public:** Whether other users can download the data.
- **Make This Collection Visible:** Whether other users can see the data.
- **Parent Collection:** Upper Directory
- **Internal Collection:** Lower Directory
- **Files:** Select files on IHDH to add to the collection

The image shows a 'Create New Collection' dialog box with a light gray background and a blue header bar. The header bar contains the title 'Create New Collection' and a close button (X). The dialog is organized into several sections. The first section is 'Collection Description', which has a large text input field. Below this is the 'Name' section with a text input field. The 'Institution Logo' section also has a text input field. The 'Make This Collection Public:' section features a toggle switch that is currently turned on. The 'Make this collection Visible:' section has a toggle switch that is also turned on. The 'Parent Collection:' section includes a dropdown menu showing 'root'. The 'Internal Collections:' section has a dropdown menu and a count of '0', with an 'Add Collection' button. The 'Files:' section has a dropdown menu and a count of '0', with an 'Add File' button. At the bottom of the dialog are two buttons: 'Cancel' and 'Save' (which has a checkmark icon).

Make this collection Visible: ☒

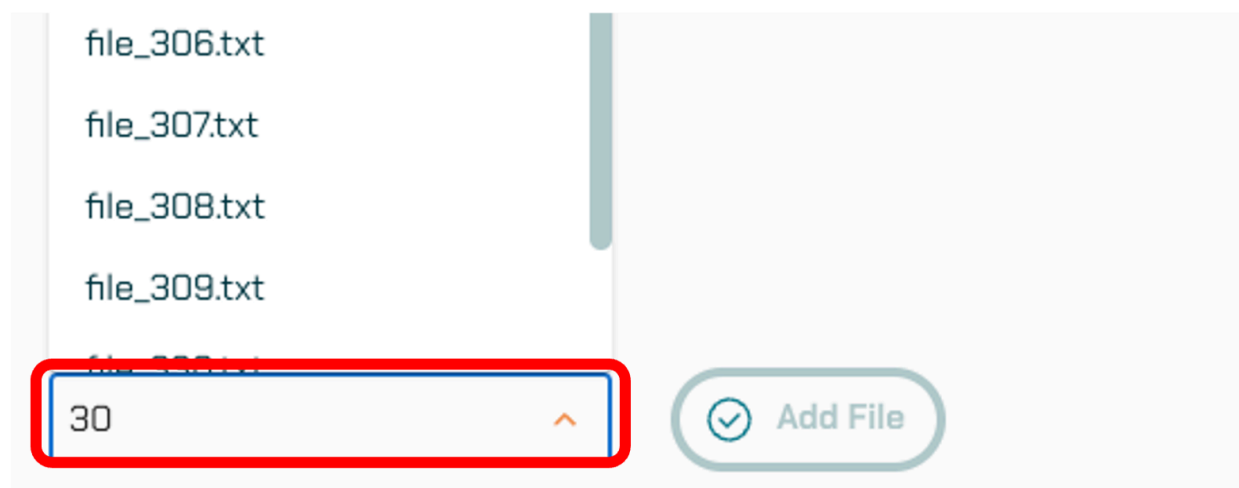

Parent Collection: root

Internal Collections: 0

Files: 0

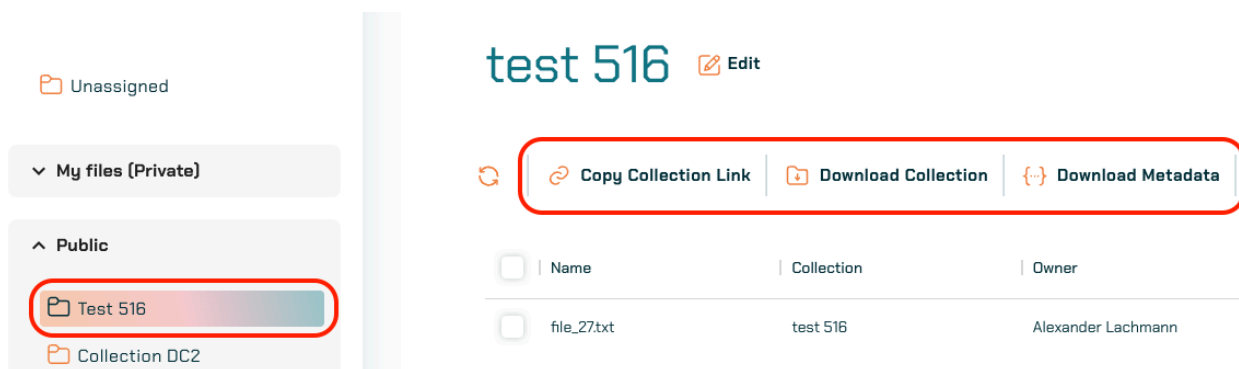

Cancel Save

You can now add multiple files to the collection. The files should be already uploaded on IHDH and you can search for the file with its name.

4.2 Sharing and Downloading Collections

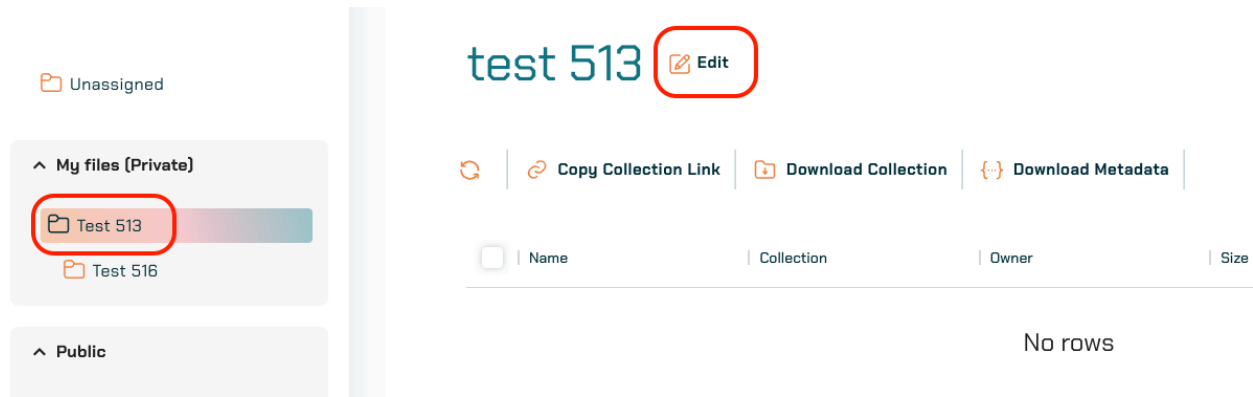

Based on the collection level, you can obtain a link that you can share with other users using the [Copy collection link](#). With [Download collection](#), you can download all files under the collection at once. You can also download the metadata in JSON format using [Download metadata](#). Click the name of the collection to access it.

4.3 Editing Collections

You can change the settings of the collection.

Click the collection and then the Edit button will become available next to the title of the collection.

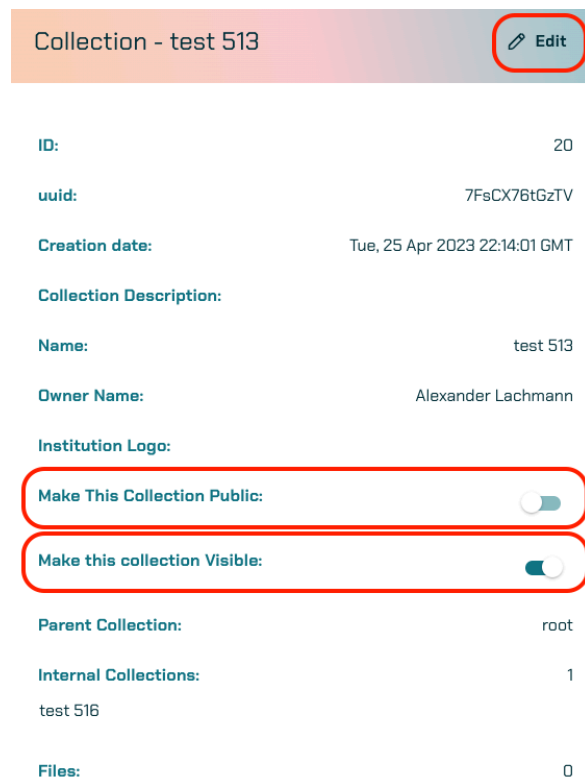

Make This Collection Public:

Users can make a collection private or public

Make This Collection Visible:

Users can make a collection visible or invisible

By clicking the **Edit** button again, you should be able to change the attributes of the collection.

- **Copy link:** Get the link to download the file
- **Download File**
- **Download Metadata:** Get metadata in JSON format

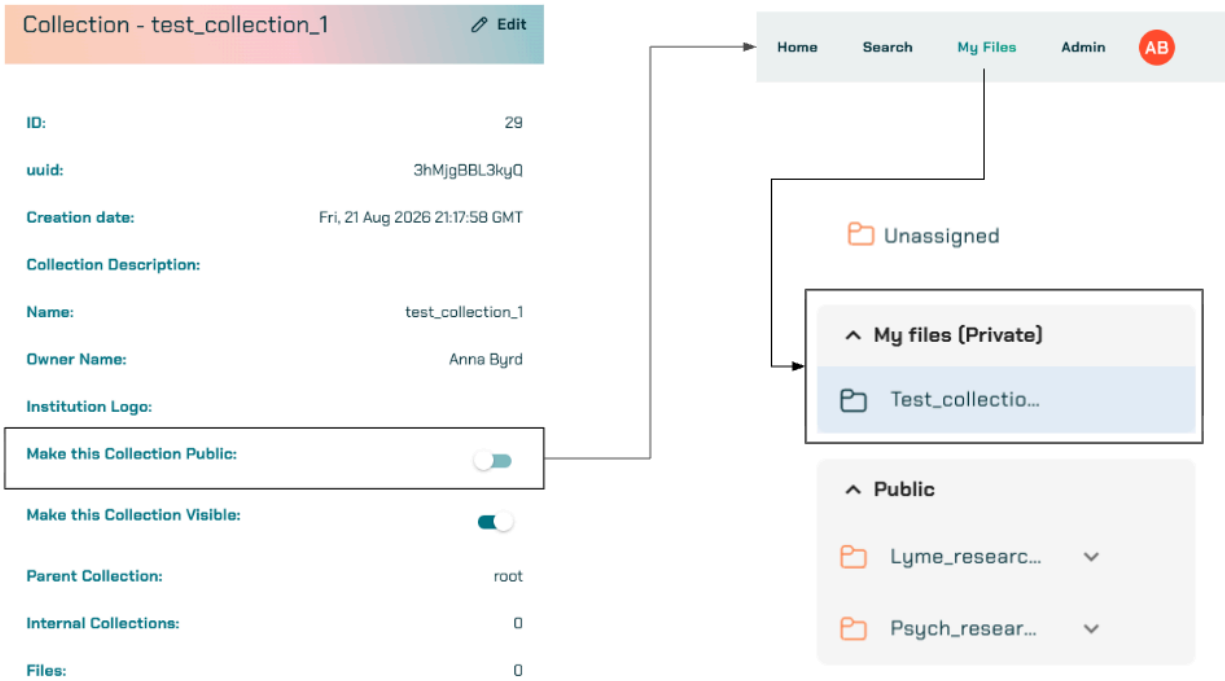

5. Data Visibility

IHDH offers two main modes of controlling visibility. The first is at the file level, the second is at the collection level.

5.1 Controlling Privacy of Collections

When the “make collection public” switch is toggled ON (above, left), the collection will be public. The collection is now viewable by anyone with access to the IHDH platform by clicking on “Search” (above, right).

When the “make collection public” switch is toggled OFF (below, left), the collection will be private. The collection is only viewable to the Owner (under “Owner Name”) under the tab “My Files”.

5.2 Controlling Privacy of Collections

Files have two levels of permissions. The first, "Accessibility", controls who is able to download the file. Setting accessibility to “Open” enables all IHDH users to download the file. Setting accessibility to “Locked” ensures only the owner can download the file. The second, “Visibility”, controls who is able to see the file in the file browser. Setting visibility to “visible” allows any logged-in user to be able to view the file under “Search”. Setting visibility to “hidden” ensures only the owner is able to see the file, which will be visible in “My Files”.

6.2 Accessing Data Files

When you find the data files after a search, you can obtain a shareable URL of the file, you can download the file, or download the metadata about the file in JSON format.

Copy Link provides the file download URL by copying it to the clipboard.

The screenshot shows the 'Data Search' interface. At the top, there's a title 'Data Search' and a subtitle 'Search and download the files you need. To upload files you need to Request Data Access from the menu.' Below this is a row of action buttons: 'View Details', 'Copy Link', 'Download File', 'Download Metadata', and 'More'. The 'Copy Link' button is highlighted with a red box. Below the buttons is a table with columns: 'Name', 'Collection', 'Owner', 'Size', and 'Creation Date'. The table contains three rows of data. The first row is 'test.jpg' with collection 'test_folder', owner 'Alexander Lachmann', size '132.7 KB', and creation date '07/11/2023'. This row is highlighted with a blue background. A red box is drawn around the 'test.jpg' row. A tooltip 'Unselect All' is visible over the 'More' button.

☒	Name	Collection	Owner	Size	Creation Date

If you have any questions or suggestions, or you would like to report a bug or have a feature request, please contact us at support@ihdh.io.

7. Cohen Foundation Project Overviews

Users who are logged into IHDH can view information regarding projects currently funded by the Cohen Foundation under the “Projects” page. Each project is given a card which summarizes the project aims, contact information of the project PI, and relevant data.

The project cards are able to be filtered by focus area and by keyword using the buttons above the cards.

The screenshot displays the 'Research Projects' page of the Innovative Health Data Hub (IHDH). The page features a navigation bar with 'Home', 'Search', 'Projects' (highlighted), 'My Files', 'Admin', and a user profile icon 'AB'. Below the navigation bar, the title 'Research Projects' is centered, followed by a subtitle: 'Explore research projects funded by the Cohen Foundation, including their focus areas and affiliated institutions.' A red box highlights the filter section, which includes a red text label 'Filter by project focus and keywords' and a green 'All Projects' button. Below these are two main filter categories: 'Lyme Disease' and 'Psychodelic Research'. Under 'Lyme Disease', there are numerous sub-filters: 'S-MeQ-DMT', 'Alcohol Use Disorder (AUD/MDI)', 'and Neurobiomarkers', 'Burnout (health workers)', 'Cancer-associated adjustment disorder', 'Cancer-associated anxiety', 'Cancer-associated depression', 'Diagnostics', 'End-of-life distress', 'Field Building', 'Fundamental Knowledge', 'Lyme', 'Major Depression', 'MDMA', 'Methamphetamine Use', 'Multiple', 'Obsessive-Compulsive Disorder (OCD)', 'Opioid Use Disorder (OUD)', 'Oregon Psilocybin Service Centers (multiple indications)', 'Parkinson's Disease', 'Patient Support', 'Phantom Limb Pain', 'Post-Traumatic Stress Disorder (PTSD)', 'Prevention', 'Psilocybin', 'Set & Setting: Music', 'Sexual assault-related Post-Traumatic Stress Disorder (PTSD)', and 'Therapeutics'. Below the filters, three project cards are displayed. Each card has a title, a brief description, the project name and lead PI, the affiliated institution (Tulane University), and a 'View file collection' button. The first card is titled 'Antibiotic combination therapy in mice and monkey models' and is categorized under 'Therapeutics'. The second card is titled 'Investigating the presence and persistence of Lyme and Bartonella infections in animals and humans' and is categorized under 'Fundamental Knowledge'. The third card is titled 'Lyme persistence - M. Embers - cultivating antibiotic treated Bb' and is also categorized under 'Fundamental Knowledge'. To the right of the project cards, a blue text label reads 'Project description cards: Descriptive project title, Official project title, Keywords, Affiliated Institution, Contact info'.

7.1 Associating Collections with a Project

In order for a project to become connected with existing collections, users must manually assign a collection to the project. This can be accomplished by navigating to My Files, selecting

the desired collection, and then “Edit”. From there, select your project from the dropdown menu under project_id. The collection is now connected to the project, and “View file collection” will appear on the project’s card in the Projects page.
